Career Goals

I would enjoy a job where I can continue to improve my skills in PHP/MySQL, XHTML, CSS and JavaScript. The kind of industry doesn't matter much as long as the atmosphere is collegial and conducive to learning and sharing information. I'm at my best when I can work hard with relatively low pressure.

- To continue to learn (especially programming)
- To have fun
- To have the satisfaction of doing good work
- To feel respected and valued
- To feel I'm contributing
- To be able to have a flexible schedule
- To be able to do at least some of the work from home
- Casual atmosphere
- In or near Atlanta, GA
